Published monthly

Publishing, Subscription and Advertising Offices: Headington Hill Hall, Oxford OX3 0BW, U.K. (0865-794141).

Continental Shelf Research
Annual Institutional Subscription Rate (1992): £335.00 (U.S.$535.00)
Two-year Institutional Rate (1992/93): £636.50 (U.S.$1016.50)
Personal subscription rate for those whose library subscribes at the regular rate is available on request.

Continental Shelf Research with *Oceanographic Literature Review*
Annual Institutional Subscription Rate (1992): £700.00 (U.S.$1120.00)
Two-year Institutional Rate (1992/93): £1330.00 (U.S.$2128.00)

Sterling prices are definitive. U.S. dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Subscription rates for Japan are available on request.

Back issues of all previously published volumes, in both hard copy and on microform, are available direct from Pergamon Press Offices.

Subscription enquiries from customers in North America should be sent to: Pergamon Press Inc., 395 Saw Mill River Road, Elmsford, NY 10523, U.S.A.; and for the remainder of the world to: Pergamon Press plc., Headington Hill Hall, Oxford OX3 0BW, U.K.

Photocopying Information for Users in the U.S.A.
The Item-Fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law is paid. The appropriate remittance of $3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970.

Permission for Other Use
The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the Publisher for such copying.

The Item-Fee Code for this publication is: 0278 — 4343/91 $3.00 + 0.00

Contents of Volume 11

January

S. McCLATCHIE, P. JAQUIERY, R. KAWACHI and C. PILDITCH — 1 Grazing rates of *Nyctiphanes australis* (Euphausiacea) in the laboratory and Otago Harbour, New Zealand, measured using three independent methods

W. FENNEL, T. SEIFERT and B. KAYSER — 23 Rossby radii and phase speeds in the Baltic Sea

M. I. SCRANTON and K. McSHANE — 37 Methane fluxes in the southern North Sea: the role of European rivers

M. R. MITCHELL — 53 The influence of local wind forcing on the low-frequency variations of chlorophyll *a* in a small marine basin

J. V. BARRIE — 67 Contemporary and relict titaniferous sand facies on the western Canadian continental shelf

S. C. SHENOI and M. K. ANTONY — 81 Current measurements over the western continental shelf of India

S. NÔMMANN, J. SILDAM, T. NÔGES and M. KAHRU — 95 Plankton distribution during a coastal upwelling event off Hiiumaa, Baltic Sea: impact of short-term flow field variability

List of Contents for *Deep-Sea Research*, Vol. 37, No. 12 — i

February

R. W. STERNBERG, G. C. KINEKE and R. JOHNSON — 109 An instrument system for profiling suspended sediment, fluid, and flow conditions in shallow marine environments

J. MANNING — 123 Middle Atlantic Bight salinity: interannual variability

B. GJEVIK — 139 Simulations of shelf sea response due to travelling storms

Y. ISODA, T. YANAGI and H.-J. LIE — 167 Sea-level variations with a several-day period along the southwestern Japan Sea coast

S. K. CHOUGH, H. J. LEE and S. J. HAN — 183 Sedimentological and geotechnical properties of fine-grained sediments in part of the South Sea, Korea

M. KASHGARIAN and N. TANAKA 197 Antarctic Intermediate Water intrusion into South Atlantic Bight shelf waters

Note
D. G. BOWERS, T. P. RIPPETH and J. H. SIMPSON 203 Tidal friction in a sea with two equal semidiurnal tidal constituents

List of Contents for *Deep-Sea Research*, Vol. 38, No. 1 i

March

A. W. HERMAN, D. D. SAMEOTO, CHEN SHUNNIAN, M. R. MITCHELL, B. PETRIE and N. COCHRANE 211 Sources of zooplankton on the Nova Scotia Shelf and their aggregations within deep-shelf basins

P. G. K. MURTHY and P. V. HAREESH KUMAR 239 Response of coastal waters off Karwar to a deep depression

D. G. MOUNTAIN 251 The volume of Shelf Water in the Middle Atlantic Bight: seasonal and interannual variability, 1977 – 1987

P. G. BAINES, G. HUBBERT and S. POWER 269 Fluid transport through Bass Strait

B. JOHNS, G. S. RAO, S. K. DUBE and P. C. SINHA 295 An application of a wind-driven coastal upwelling model in the western Bay of Bengal

List of Contents for *Deep-Sea Research*, Vol. 38, No. 2 i

April

J. MCCLEAN-PADMAN and L. PADMAN 321 Summer upwelling on the Sydney inner continental shelf: the relative roles of local wind forcing and mesoscale eddy encroachment

M. PARRA, B. CHAPUY, J.-C. PONS and C. LATOUCHE 347 The nature and origin of smectites in the Kerguelen-Heard Archipelagoes of the southern Indian Ocean

H. FREY 365 A three-dimensional, baroclinic shelf sea circulation model—1. The turbulence closure scheme and the one-dimensional test model

M. ŠOLIĆ and N. KRSTULOVIĆ 397 Time series of heterotrophic bacteria density in the central Adriatic Sea

List of Contents for *Deep-Sea Research*, Vol. 38, No. 3 i

May

J. H. CHURCHILL and P. C. CORNILLON 409 Gulf Stream water on the shelf and upper slope north of Cape Hatteras

V. A. LUTZ and J. I. CARRETO 433 A new spectrofluorometric method for the determination of chlorophylls and degradation products and its application in two frontal areas of the Argentine Sea

A. J. ELLIOTT, T. CLARKE and Z. LI 453 Monthly distributions of surface and bottom temperatures in the northwest European shelf seas

A. J. ELLIOTT and T. CLARKE 467 Seasonal stratification in the northwest European shelf seas

E. SVENDSEN, R. SÆTRE and M. MORK 493 Features of the northern North Sea circulation

List of Contents for *Deep-Sea Research*, Vol. 38, No. 4 and No. 5 i

June

M. L. VIANNA, R. SOLEWICZ, A. P. CABRAL and V. TESTA 509 Sandstream on the northeast Brazilian shelf

M. FRIGNANI and L. LANGONE 525 Accumulation rates and ^{137}Cs distribution in sediments off the Po River delta and the Emilia-Romagna coast (northwestern Adriatic Sea, Italy)

W. G. HUANG, A. P. CRACKNELL, R. A. VAUGHAN and P. A. DAVIES 543 A satellite and field view of the Irish Shelf front

P. D. CRAIG 563 Incorporation of damping into internal wave models

List of Contents for *Deep-Sea Research*, Vol. 38, No. 6 i

July

G. GODIN — 579 Compact approximations to the bottom friction term, for the study of tides propagating in channels

D. C. CHAPMAN, G. S. GIESE, M. G. COLLINS, R. ENCARNACION and G. JACINTO — 591 Evidence of internal swash associated with Sulu Sea solitary waves?

M. PUJOS and O. JAVELAUD — 601 Depositional facies of a mud shelf between the Sinu river and the Darien Gulf (Caribbean coast of Colombia): environmental factors that control its sedimentation and origin of deposits

M. J. GIBBONS, S. C. PILLAR and V. STUART — 625 Selective carnivory by *Euphausia lucens*

P. MUNK, M. HEATH and B. SKAARUP — 641 Regional and seasonal differences in growth of larval North Sea herring (*Clupea harengus* L.) estimated by otolith microstructure analysis

Note

P. T. HARRIS — 655 Reversal of subtidal dune asymmetries caused by seasonally reversing wind-driven currents in Torres Strait, northeastern Australia

Book Review

K. BANSE — 663 *Trophic Relationships in the Marine Environment* by M. BARNES and R. N. GIBBONS

August–October

Introduction 665

WESTERN CANADIAN CONTINENTAL SHELVES

Keynote papers

W. R. CRAWFORD and R. E. THOMSON — 669 Physical oceanography of the western Canadian continental shelf

B. D. BORNHOLD and J. V. BARRIE — 685 Surficial sediments on the western Canadian continental shelf

J. V. BARRIE, B. D. BORNHOLD, K. W. CONWAY and J. L. LUTERNAUER — 701 Surficial geology of the northwestern Canadian continental shelf

R. W. MACDONALD and T. F. PEDERSEN — 717 Geochemistry of sediments of the western Canadian continental shelf

R. O. BRINKHURST — 737 Benthic biology of the western Canadian continental shelf

Speciality papers

T. F. Moslow, J. L. Luternauer and K. Rohr — 755 Origin and late Quaternary tectonism of a western Canadian continental shelf trough

K. W. Conway, J. V. Barrie, W. C. Austin and J. L. Luternauer — 771 Holocene sponge bioherms on the western Canadian continental shelf

ARCTIC CANADIAN CONTINENTAL SHELVES

Keynote papers

J. T. Andrews, A. E. Jennings, B. MacLean, P. J. Mudie, D. Praeg and G. Vilks — 791 The surficial geology of the Canadian eastern Arctic and Polar continental shelves

P. R. Hill, S. M. Blasco, J. R. Harper and D. B. Fissel — 821 Sedimentation on the Canadian Beaufort Shelf

R. W. Macdonald and D. J. Thomas — 843 Chemical interactions and sediments of the western Canadian Arctic Shelf

A. G. Carey, Jr — 865 Ecology of North American Arctic continental shelf benthos: a review

J. W. Kamphuis — 885 Engineering concerns for the Canadian Arctic continental shelf

Speciality papers

J. P. M. Syvitski — 897 Towards an understanding of sediment deposition on glaciated continental shelves

C. M. T. Woodworth-Lynas, H. W. Josenhans, J. V. Barrie, C. F. M. Lewis and D. R. Parrott — 939 The physical processes of seabed disturbance during iceberg grounding and scouring

J.-M. Gagnon and R. L. Haedrich — 963 A functional approach to the study of Labrador/Newfoundland shelf macrofauna

EASTERN CANADIAN CONTINENTAL SHELVES

Keynote papers

P. C. Smith and F. B. Schwing — 977 Mean circulation and variability on the eastern Canadian continental shelf

D. J. W. Piper — 1013 Seabed geology of the Canadian eastern continental shelf

C. L. Amos and J. T. Judge — 1037 Sediment transport on the eastern Canadian continental shelf

R. Pocklington, J. D. Leonard and N. F. Crewe — 1069 Sources of organic matter to surficial sediments from the Scotian Shelf and Slope, Canada

J. Grant, C. W. Emerson, B. T. Hargrave and J. L. Shortle — 1083 Benthic oxygen consumption on continental shelves off Eastern Canada

D. E. Buckley — 1099 Deposition and diagenetic alteration of sediment in Emerald Basin, the Scotian Shelf

Speciality papers

G. B. J. Fader — 1123 Gas-related sedimentary features from the eastern Canadian continental shelf

D. L. Forbes, R. Boyd and J. Shaw — 1155 Late Quaternary sedimentation and sea level changes on the inner Scotian Shelf

B. Boczar-Karakiewicz, J. L. Bona and B. Pelchat — 1181 Interaction of internal waves with the seabed on continental shelves

R. L. Haedrich and J.-M. Gagnon — 1199 Rock wall fauna in a deep Newfoundland fiord

V. G. Koutitonsky, B. Long, D. Lefaivre and M. Sala — 1209 The influence of hydrodynamical processes on sediment transport in the northern Gulf of St Lawrence

D. C. Schneider and R. L. Haedrich — 1223 Post-mortem erosion of fine-scale spatial structure of epibenthic megafauna on the outer Grand Bank of Newfoundland

S. N. Messieh, T. W. Rowell, D. L. Peer and P. J. Cranford — 1237 The effects of trawling, dredging and ocean dumping on the eastern Canadian continental shelf seabed

J. T. Kelley and D. F. Belknap — 1265 Physiography, surficial sediments and Quaternary stratigraphy of the inner continental shelf and nearshore region of the Gulf of Maine

N. E. Ostrom and S. A. Macko — 1285 Late Wisconsinan to present sedimentation of organic matter off northern Newfoundland in response to climatological events

GENERAL REVIEWS

J. H. Simpson — 1297 Symposium review of the physical oceanography of Canadian continental shelves

M. E. Field — 1299 Symposium review of the surficial geology of Canadian continental shelves

I. N. McCave — 1303 Symposium review of the sediment dynamics of Canadian continental shelves

G. T. Rowe — 1305 Symposium review of the benthic ecology of Canadian continental shelves

M. B. COLLINS 1309 Continental Shelf Research: a review

STATEMENT OF POLICY

Continental Shelf Research is published monthly. Articles dealing with the results of fundamental and original research in physical oceanography, chemistry, ecology, sedimentology, etc., together with contributions on applied aspects of continental shelf research, are considered for publication.

The Journal is distinct from those dealing specifically with estuarine, coastal, and deep-sea research, and it forms a complementary role to other Pergamon journals. Emphasis is placed on interdisciplinary process-oriented contributions, and encouragement is given to the publication of the results of innovative experimental studies with general applicability. *Continental Shelf Research* also includes a section on *Notes, Instrumentation and Methods*, as well as occasional review articles and letters received by the Editors. Papers are open for written discussion for up to three months following their original publication; both this discussion and the author's response will be published together.

Review articles on specific aspects of continental shelf research are published, although longer articles of this nature are generally more appropriate to *Progress in Oceanography*. Similarly, papers concerned with research which is predominantly in deeper waters would be more appropriate for *Deep-Sea Research*.

A minimum of two referees reviews each manuscript, with, at least, one being selected from the Editorial Board. Further, Editorial Board members advise the Editors on the selection of supplementary referees. In this way, a high standard of scientific content is maintained.

NOTES FOR CONTRIBUTORS TO CONTINENTAL SHELF RESEARCH

Manuscripts

Papers, including the abstract, footnotes, and reference list, should be typed double spaced on one side only and submitted in *quadruplicate*. The text must be ready for printing and should have been checked carefully for errors. Unless otherwise specified, proofs will be sent to the first-named author for correction. Alterations should be avoided, apart from typographical errors made by the printer. Additional alterations will delay publication and, if excessive, may be charged to the author. Proofs should be returned within 48 hours of receipt.

If the paper depends upon data given in another paper "in press" or otherwise unavailable, three copies of the latter paper should accompany the submitted manuscript.

The essential contents of the manuscript should be preceded by an abstract, which should summarize the entire paper; it should be intelligible in itself.

In general, metric units should be used, preferably the Système International (S.I.). If other units are used (fathoms, °F, etc.), the metric equivalents must be given either in parentheses ( ) or by presenting the dimensionally correct conversion factors as a footnote.

Submission of a paper to the Editor will imply that it has not been published previously, that it is not under consideration for publication elsewhere, and that if accepted for *Continental Shelf Research* it will not be published elsewhere in the same form, in English or in any other language, without the written consent of the publisher. Copyright in published papers will be vested in the publisher.

Written discussion on papers should be copied and sent to both Editors.

Illustrations and tables

Good quality original illustrations and tables, accompanied by three A4-sized photocopies should be submitted with the text.

Half-tone illustrations are to be restricted to a minimum and should accompany the paper, as separate sheets. Photographs should be enlarged sufficiently to permit their clear reproduction in half-tone. The half-tone prints should fit within the type area after reduction. They should normally be about twice the final size required. When appropriate they should clearly indicate the size of the

(*Continued on inside back cover*)

Printed in Great Britain by Henry Ling Ltd., The Dorset Press, Dorchester, Dorset

(*Continued from outside back cover*)

photographed object. The back may be marked in pencil to show any area that need not be reproduced and should carry the figure number and author's name.

Line drawings should include all relevant details, and it is particularly requested that glossy photographic prints be sent with the manuscript, or on its acceptance, as well as copies for the use of the Editor and referees. Illustrations should usually be made to fit the type area after reduction. Unnecessary detail in a base chart should be avoided. The cost of fold-in charts or diagrams and of colour plates must be borne by the author or his institution.

Captions to figures should be typed double spaced on a separate sheet.

Tables should be suitable for direct reproduction as, in the interest of economy and to avoid the introduction of errors, tables generally will be reproduced by photo-offset directly from the author's typed manuscript. Each should be typed on a separate sheet. The places where they are to appear should be maked in pencil in the text.

References

References to the published literature should be quoted in the text as follows: SMITH (1970), the date of publication, in parentheses, following the author's name. When there is more than one author, the first author's name and *et al.*, may be used to designate three or more authors. References should be listed together at the end of the paper, not as footnotes. They should be arranged in alphabetical order (first author's surname) to appear as follows:

GREEN C. K. (1944) Summer upwelling — northeast coast of Florida. *Science*, **100** (2607), 546 – 547.

JOHNSTON R. (1973) Nutrients and metals in the North Sea. In: *North Sea science*, E. D. GOLDBERG, editor, MIT Press, Cambridge, pp. 293 – 307.

LAMB H. (1932) *Hydrodynamics*, 6th Edition, Dover, New York, 738 pp.

MAY P. M. (1979) Analysis and interpretation of tidal currents in the coastal boundary layer. Ph.D. Thesis, Massachusetts Institute of Technology and Woods Hole Oceanographic Institution, 197 pp.

PINGREE R. D., P. M. HOLLIGAN and G. T. MARDELL (1978) The effects of vertical stability on phytoplankton distribution in the summer of the northeast European shelf. *Deep-Sea Research*, **25**, 1011 – 1028.

UNESCO (1980) *Technical papers in marine sciences*. Ninth report of the Joint Panel on Oceanographic Tables and Standards, Paris, 31 pp.

It is particularly requested that (a) author's initials, (b) title of paper, (c) the volume, and (d) pagination (first and last pages inclusive or total pages of a book, thesis, etc.) be given. The title of the journal should not be abbreviated; titles of journals in the Russian language should be transliterated and not translated.

The original manuscript and diagrams will be discarded one month after publication unless the publisher is requested to return the original material to the author.

Reprints

Reprints and copies of the particular issue in which the article appears can be ordered on the form accompanying proofs. Institutional orders must be marked with the full title, authors' names, and manuscript number of the paper.

ACTA METEOROLOGICA SINICA

Edited by **The Chinese Meteorological Society**

Executive Editor: **ZHOU SHIJIAN,** *China Meteorological Press, 46 Baishiqiao Road, West Suburb, Beijing, People's Republic of China*

Acta Meteorologica Sinica provides comprehensive coverage of Chinese studies and research on all aspects of atmospheric sciences. Founded in 1924, *Acta Meteorologica Sinica* publishes theoretical and methodological articles on all aspects of atmospheric sciences, such as meteorology, climatology, synoptic meteorology, atmospheric physics, chemistry and technology. Also contained are reviews and information on symposia and notes for timely reporting of recent significant findings.

A Selection of Papers

LU HANCHENG, LEI ZHAOCHONG (PRC) & **C N DUNCAN** (UK), Lagrangian method used in the research of atmospheric circulation.

LI XINGSHENG (PRC), On similarity and the turbulent structure in the stable boundary layer.

YANG DONGZHEN, XU XIAOBIN & WEN YUPU (PRC), A case study on sandstorm.

ZHAO QIGENG (PRC), A global spectral model with variable poles and its application to the shallow-water equations.

SHE FENGNING, CHAO JIPING & WANG LIZHI (PRC), Numerical experiment of the influence of heat and wind stress on the equatorial ocean circulation.

JIANG QUN & DONG KEQIN (PRC), Influence of the vertical shear of environmental flows on typhoon motion.

S S PARASNIS & S B MORWAL (India), Mixing processes in the atmospheric boundary layer during the summer monsoon.

LU WEISONG (PRC), On the nonlinear stability of shear flows in the frictional dissipation atmosphere.

SUN LITAN & ZHAO RUIXING (PRC), On the symmetric development of Mesoscale disturbances.

WENG DUMING, SUN ZHI'AN & SHI BING (PRC), The calculation and analysis of slope net radiation in China.

DEEP-SEA RESEARCH

A Companion Journal to *Continental Shelf Research* and *Progress in Oceanography*

Deep-Sea Research is published in two parts, Part A, Oceanographic Research Papers, and Part B, Oceanographic Literature Review

Part A, Oceanographic Research Papers

Editor-in-Chief: **JOHN D MILLIMAN,**
Department of Geology and Geophysics, Woods Hole Oceanographic Institution, Woods Hole, MA 02543, USA

This journal is devoted to the publication of the results of original scientific research, the solution of instrumental problems, and new laboratory methods in the marine sciences. It is unique in the field of oceanography in its interdisciplinary approach covering a wide variety of subjects related to the geological, physical, mathematical, chemical and biological aspects of the ocean, the sea floor and the boundary layer between the atmosphere and the ocean. Papers that are particularly timely or topical may receive accelerated editorial response and publication as Rapid Response Papers.

A Selection of Papers
F L SAYLES & W H DICKINSON (USA), The ROLAI²D lander: a benthic lander for the study of exchange across the sediment-water interface.
S BAUER, G L HITCHCOCK & D B OLSON (USA), Influence of monsoonally-forced Ekman dynamics upon surface layer depth and plankton biomass distribution in the Arabian Sea.
J H LEE & G VERONIS (USA), On the difference between tracer and geostrophic velocities obtained from C-SALT data.
J L CHARLOU, H BOUGAULT, P APPRIOU, P JEAN-BAPTISTE, E ETOUBLEAU & A BIROLLEAU (France), Water column anomalies associated with hydrothermal activity between 11°40' and 13°N on the East Pacific Rise: discrepancies between tracers.
C PIERRE, C VERGNAUD-GRAZZINI & J C FAUGERES (France), Oxygen and carbon stable isotope tracers of the water masses in the Central Brazil Basin.

Part B, Oceanographic Literature Review

Editor: **FRANK C SHEPHARD,**
Marine Biological Laboratory, Woods Hole, MA 02543, USA

Oceanographic Literature Review comprises an annotated bibliography to the international research literature in all fields of oceanography, including science, mathematics and methods as well as policy, laws, economics and resource management. It publishes some 7000 abstracts per annum.

References are gathered from approximately 3500 journals and other serial publications received by the Woods Hole Oceanographic Institution and Marine Biological Laboratory Libraries. Many of these journals are covered by no other oceanographic database. *OLR* is unique in citing non-oceanographic material in the basic sciences thought to be useful to oceanographers.

Regular Contents include
Physical oceanography
Marine meteorology
Chemical oceanography
Submarine geology and geophysics
Biological oceanography
General

A New Patents Section is included in this journal.
